

Lafayette Parish Communication District

1810 W. Willow Street, Scott, Louisiana 70583 (337) 291-5060

September 15, 2021

To Whom It May Concern:

The Lafayette Parish Communication District would like to thank the Xybix Team for their partnership in designing and installing our 911 communication consoles in the Lafayette Parish Public Safety Communications Center and Emergency Operations Center.

When we set out to design and build our new 911 Center, we were determined to bring in the best technology and designs to fit our specific needs and work flow. After thoroughly researching and visiting many other communications centers, we selected the Xybix consoles since they offered many features that allowed us to customize the design and layout. From the first meeting, to the final installation, the Xybix team, headed by Brittney Musgrave, was professional and efficient and partnered with us to create state-of-the-art consoles for our 911 telecommunicators.

Our 911 personnel deal with life and death calls everyday and the Xybix consoles were specifically designed and customized for them by the Xybix's design team. We need our 911 Telecommunicators to be at the top of their game at all times and Xybix Consoles give them the design and function to be.

I personally, and the Lafayette Parish Communication District employees, would highly recommend Xybix to any other public safety agency looking for quality workstations. You will not only get the best and highest quality consoles in the business but you will gain friends and partners who will be there to support you for many years to come.

Sincerely,

A handwritten signature in black ink, appearing to read "Craig Stansbury".
