

Nebraska Public Power District
Always There When You Need Us

Dear Megan and Team,

I am writing you to thank you and share with you how appreciative we are of the entire team at Xybix and the products you provided us. We are extremely impressed with the quality of the furniture and the improvements it has made to the operation within the control center at Kearney. The team here has commented on how professional, clean, ergonomic and most of all user-friendly the new work stations are. We truly notice the noise reduction on the floor from the increased surface area of the wall panels.

I really appreciate the high levels of engagement from the Xybix team from conception through completion. Including the follow up visits to ensure satisfaction. The level of detail discussed throughout the planning process made the cutover seamless. Kelly, Tim and the installers were professional and great to work with during the installation, while maintaining live operations in the control center. This process allowed NPPD to continue to safely and reliably serve our customers through the entire upgrade without interruption.

We truly would recommend the Xybix product and team to others. You definitely know how to design, build, install, and warranty exceptional products. All this backed by an amazing highly engaged, experienced and caring team made for an easy and trouble-free process.

Sincerely,

Jamie Becker and the team at NPPD
